

Field Story Scorer Report

Source: sample_mixed_types (0)

Tab 1 — Field Rankings

Fields ranked by composite score (weighted: Completeness 30%, Type Consistency 25%, Cardinality 15%, Distribution 15%, Correlation 15%). Green ≥ 0.75 | Yellow 0.45–0.74 | Red < 0.45 .

rank	field	composite_score	field_type	null_count	unique_count
1	revenue	1.0	numeric_continuous	0	200
2	revenue_mixed	0.9775	numeric_continuous	15	185
3	customer_id	0.775	identifier	0	200
4	region	0.6287	categorical_low	0	5

Tab 2 — Field Profiles (Dimension Breakdown)

Per-field scores across all five dimensions. Scores are 0–1 ratios. Color coding matches the ranking table.

field	completeness	cardinality	type_consistency	distribution	correlation	composite_score
revenue	1.0	1.0	1.0	1.0	1.0	1.0
revenue_mixed	0.925	1.0	1.0	1.0	1.0	0.9775
customer_id	1.0	1.0	1.0	0.5	0.0	0.775
region	1.0	0.025	1.0	0.5	0.0	0.6287

Tab 3 — Chart Recommendations

Suggested visualization types per field, derived from inferred field type, cardinality ratio, and distribution score.

field	field_type	chart_recommendation	cardinality	distribution
customer_id	identifier	Count / Frequency Table — not recommended for visualization ■ All unique — likely ID column	1.0	0.5
region	categorical_low	Bar Chart, Pie Chart (if ≤6 cats), Treemap	0.025	0.5
revenue	numeric_continuous	Histogram, Box Plot, Violin Plot ■ All unique — likely ID column	1.0	1.0
revenue_mixed	numeric_continuous	Histogram, Box Plot, Violin Plot ■ All unique — likely ID column	1.0	1.0

Tab 4 — Pearson Correlation Matrix (Numeric Fields)

Pearson correlation coefficients for all numeric fields. Green = strong positive, Red = strong negative, White = near-zero.

index	revenue	revenue_mixed
revenue	1.0	1.0
revenue_mixed	1.0	1.0
